Mountain Weather Forecast

Snowdonia National Park

Forecast valid from 00:00 on Saturday 28 Nov 2020 until 23:59 on Sunday 29 Nov 2020

Forecast Issued on Friday 27 Nov 2020 at 14:52

Confidence: Cloud cover and extent of poor visibility across the hills holds the most uncertainty in the forecast with some marked differences possible. High for wind strengths and temperatures.

Headline for Saturday 28 Nov 2020: Low cloud and poor visibility dominating conditions. Best shelter across the west.

Forecast for Saturday 28 Nov 2020

Weather: The day will be dominated by extensive low cloud across most areas, with the south and east seeing few if any breaks. Best of any limited shelter across western foothills and the Snowdon area. Spells and drizzle will accompany this cloud through afternoon. Little change through evening.

Chance of cloud free mountain/hill tops above 800m: 20% across the far west, otherwise virtually no chance with cloud extensive above 300-500m.

Visibility: Mist or fog will dominate above modest elevations but the far west and northwest will see some improvement, this perhaps marked at times.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Poor visibility hampering navigation for much, if not all, of the day. Best of the shelter across western foothills.

Forecast for Sunday 29 Nov 2020

Weather: Another mainly overcast and rather dull day with persistent hill fog across most areas, as well as in the valleys at times. However, some bright or sunny spells are possible but these likely limited in extent and duration.

Maximum wind: 5-10mph, variable in direction.

Chance of cloud free mountain/hill tops above 800m: 30% with cloud rather extensive and persistent above 300-500m.

Visibility: Expected to be generally no more than a kilometre or two above modest elevations. Much improved at low levels.

Temperature: **Valleys:** 6 to 8 Celsius.
At 800m: 3 or 4 Celsius.
Freezing level: Above summits.
